SUMMARY

I am a 33-year-old student completing Business Information Technology degree focusing on Software Development. I have completed all the required courses for graduation with excellent grades, even though it's only my second academic year. My next step is to find an Internship/Trainee or Junior position with the potential to transition into a full-time role and further develop my skills. As an aspiring Full Stack Developer, I have acquired experience in both front- and back-end development environments working with programming languages such as Java, JavaScript TypeScript and React Native. Lately I've been working mostly with projects in Node.js runtime environment. I am known for my easygoing and positive attitude, and I am a team player who is fun to work with. Available for full-time employment starting from September 2023.

SKILLS

Programming/Development
- **Java:** I have Implemented several Spring Boot Maven projects using both JPA and JDBC data management techniques. I can develop RESTful API interfaces as well as server-side applications.
- **HTML5/JavaScript/CSS**: Proficient in using traditional HTML5 tools.
- **React**: I have implemented several web applications that utilize various libraries components and APIs
- **Node.js**: Solid understanding of the basics and its usage in building both, server- and client-side applications using Express and Next.js technologies.
- **React Native**: Used React Native for online chess game and Home Cook app that generates recipes and more with OpenAI's API.
- **Typescript**: Using TypeScript for all current and new JavaScript projects.
- **Python**: I have completed University of Helsinki's Introduction to Python course.

Cloud and Database
- **Azure**: AZ-900: Microsoft Azure Fundamentals certificate in the works.
- **SQL**: I Understand how to design and create databases and how to use them with SQL commands.
- **FIREBASE**: I used Firebase Real Time Database and Storage for my film photography website and my React Native recipe application.
- **MongoDB**: Using MongoDB on my MERN-stack portfolio website that I am currently working on.

Version control
- **Git**: Used in most of the projects, learning more every day.

LANGUAGES

English: fluent
Finnish: native language

EDUCATION

08/2021 - Current
Haaga-Helia University of Applied Sciences
Helsinki, Finland

Business Information Technology:
Software Development
Average 4,5/5

08/2006 - 09/2010
Vuosaari High-School
Helsinki, Finland

Matriculation Examination

WORK HISTORY

Swissport Finland - **Ramp Agent**
02/2011 - 10/2022
Aviator Finland – Ramp Agent
05/2023 – 08/2023
Vantaa, Finland

- Communicated with other airports and contacted passengers to track and deliver luggage that was missing or left behind to the right destination.
